

Serving research communities

Through OMII-Europe training

OMII-Europe is an EU FP6 Research Infrastructures Project [INFSO-RI-031844](#)

omii europe
open middleware infrastructure institute

OMII-Europe components: BES, OGSA-DAI, VOMS, RUS, Portal...
 OMII-Europe platforms: gLite, Globus, UNICORE, CROWN

Training modules

Delivered as

Web-based material

Users can pick what they want to learn and progress at their own speed, with remote support

Courses

Learn about the components and middleware, and how to use them

Workshops

Community-specific events that allow a deeper exploration of the benefits of OMII-Europe software

Serving research communities

OMII-Europe training

OMII-Europe's goal is to facilitate e-science by simplifying access and use of grid resources in heterogeneous e-infrastructures. Providing standards-based middleware components is just the first step. By outreach and dissemination, OMII-Europe establishes links with potential users of the components, and the training activity communicates the concepts and skills that are needed to realise this potential.

Courses, workshops and web-based material

We deliver training through courses, workshops and web-based material. The primary focus is on the **OMII-Europe components**. However, we also provide training on the various **Grid middleware platforms** so that users can fully understand the components deployed on them.

Who is involved in OMII-Europe training?

The OMII-Europe training team has bases in **Europe** and **China**. We cooperate closely with training activities in related Grid projects too (see Figure 2). This includes supporting these projects' trainers as they introduce our components to their members. We invite you to contact us to discuss your training requirements (training@omii-europe.org).

Figure 2: OMII-Europe has training links with many other projects

Please see <http://training.omii-europe.org> for forthcoming events, web-based training and ways to contact us.
